

CropMag® 200 Suspension Grade Magnesium Oxide for Plant Food

DESCRIPTION	CropMag 200 is a high purity, plant food grade magnesium oxide produced from magnesium-rich brine and dolomitic lime.								
USES	CropMag 200 is an excellent source of magnesium for liquid suspension fertilizer mixtures. The fine particle size of CropMag 200 maintains a stable suspension and fast availability to crops. Minimal chemical reaction of CropMag 200 with other ingredients in suspension fertilizer mixtures helps maintain viscosity levels for desirable handling and spreading.
